AURÉLIE MATHIGOT

## RADICAL LINEN

In a symbolic encounter, mid-way between the naturalness of flax and its multiple uses, artist Aurélie Mathigot adorns the Tree with a second skin, textile and tactile! A forest revisited, trees draped and protected by the full diversity of new linens, stone-washed, contemporary jacquard, coated linen, knits and of course the outdoor version. An ecological niche where the notions of well-being, sensuality and innovation come together.

CHIMÈRE

## CAGE À OISEAUX AND AQUARIUM

Founded by Frederic Stouls and Marc Ange, Chimère is the first publisher of contemporary furniture dedicated to pets. Beyond the comfort and the functionality expected for our pets, each piece published by Chimère is a decorative element sublimating human habitat: soft and noble materials combined with high quality manufacturing. The design is the work of Bloom Room - Marc Ange's agency - who injected a dose of collective unconscious into their creations, offering each piece a timeless soul.
